Attachments: Talking Points for Administrator Pruitt's CA Visit 3 20 2018 .docx

Flag: Follow up

Draft attached, apologies for the delay! A few CA specific issues to gather info on. For the usual issues, I included WPS/C&T and ESA, dicamba, glyphosate, but removed PRIA and chlorpyrifos. It got a bit long, but covers a lot.

Since you also mentioned mosquito control yesterday evening, I included the biotech info, though I'm not sure that will be part of the convo, as well as some info on reg review for malathion/naled. Let me know of any edits.

Thanks,
Kaitlin

Kaitlin,
The Administrator is heading to California Thursday and will be meeting with some CA Ag groups and touring an Almond facility. Can we put together some talking points that may be CA relevant?

I presume this would include:

WPS/CT

Glyphosate

Dicamba

And likely a few more...

Thanks.
